

MobiLED Compact: new sign with integrated control panel

Advantage:

- Compact design with a resolution of 16x112
- Automatic night dimming
- Can type destinations directly on the sign
- Transfer destination via USB

MobiLED Compact is a small destination sign for tourist coaches and minibuses with a resolution of 16x112 pixels, the sign is equipped with an integrated control panel on the back.

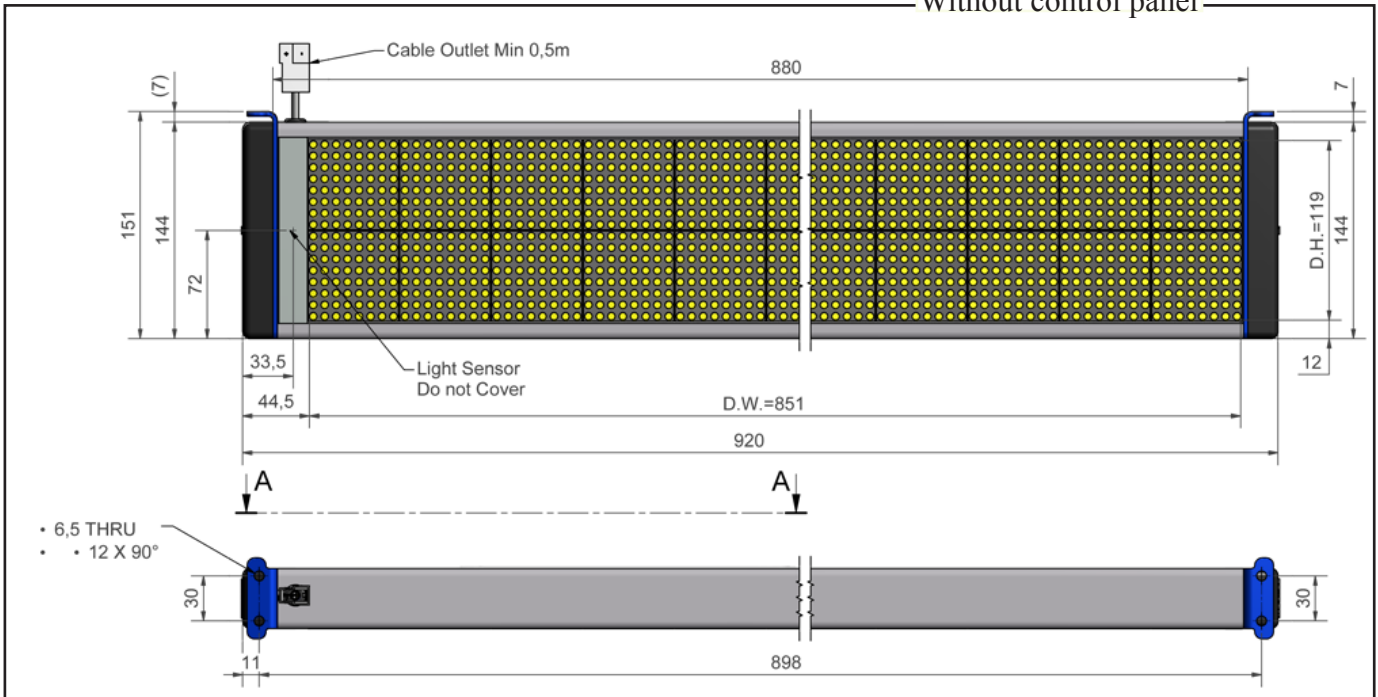

The new sign from Mobitec comes in two versions:

- One with integrated control panel, and a slave sign without control.

With an integrated control panel, see pictured above, it is possible to type destinations directly on the back of the sign, and furthermore destinations programmed in MIE3 can be transferred via a USB key.

Note that the integrated control panel at MobiLED Compact who is similar to ICU600 has not the same functionalities built.

Without control panel
