

MobiSCREEN – TFT Infotainment

MobiSCREEN TFT Infotainment signs respond to the growing demand for passenger information inside the vehicle. It is built in a robust, steel metal case with a special hardened glass and state-of-the art design. The TFT displays can provide all types of route information: start and end destination, following stops, route numbers, date and time and a "bus stopping" signal if customers so desire – why not using your individual corporate design? Everything is possible and easy to upload via USB.

The displays can also handle additional information stored in standard media formats like pictures or movies for example for advertisements, which can be a revenue generating source for your company.

MobiSCREEN displays are maintenance free in standard system configuration, without movable parts like fans for example. The housing is protected against humidity and dust and the modular concept allows you to add further functionality like W-LAN, GPRS or Audio.

FEATURES

- Compact all-in-one unit
- Robust steel metal case
- Easy USB memory update
- Master/Slave configuration

BENEFITS

- Optimal presentation of all passenger information
- Individual corporate design layout
- Handles additional information like advertisement
- Maintenance free

TECHNICAL DATA

Supply voltage	Nominal Supply	24 V DC 18-32 V DC
Power consumption	Max.	4,6 A
Interfaces	Standard	IBIS and RS485, USB, STOP-Signal, Ethernet
	Option	W-LAN, audio output, additional digital inputs
Operating system		Linux
Temperature range		0 to 50 °C
Viewing angle (h/v)		150/160
Resolution		1440 x 900 pixel
EMC		2006/28/EC
Luminous intensity	Min.	400 cd/cm ²

We reserve the right to change the technical specification without prior notice.
